Choosing Green?

Choose *The Shed Shop*...
...the "Greenest" sheds in the Bay Area.

"Radiata Pine" 3/4 inch Plywood Floor

Our plywood flooring is produced using wood supplied by ISO 14001 certified plantations. This certification guarantees that all forestry operations are carried out in an environmentally responsible manner and are certified under the PEFC endorsed CERTFOR standard.

Louisiana Pacific "SmartSide" Vertical & Louisiana Pacific "SmartSide" Horizontal Shiplap Siding

LP SmartSide products start with sustainably harvested premium hardwoods, which are then engineered with the non-toxic SmartGuard process. LP SmartSide factories are driven by energy provided by waste wood unfit for use in its products.

Radiant Barrier Roof Sheathing

All Shed Shop sheds feature LP Techshield roof decking, which blocks up to 97% of the radiant heat in the panel from entering your attic area, which keeps your shed cooler.

Wood waste is recycled

At the end of our manufacturing process, all wood waste is sent for recycling.

Low-E Glass Double-Pane Windows

As of Oct. 1, 2009, all windows will have high-performance Low-E insulating glass which helps sheds stay cooler in the summer and warmer in the winter, prevents fading of interior furnishings, and reduces condensation. It also delivers greater light transmittance than tinted glass.

In warm weather, Low-E glass reflects the sun's energy and prevents it from entering the building; reduces amount of heat loss in winter.

"Green" Features of our Studio Sheds

Title 24 Low-Energy Requirements

Our Studio model typically meets California's stringent Title 24 efficiency standards for residential buildings.

Low VOC Interior Paint

Studio interiors are painted with Behr "Premium Plus Ultra" Low VOC paint.
